Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Hints on Levelling Operations, as Applied to the Reading of Distances by the Law of Perspective, and the Saving Thereby of Chainmen in a Level Survey: With Remarks on the Other Advantages That Can Be Gained in a Survey by Adopting This Principle in the Use of Any Ordinary Levelling Telescope and Staff According to the laws of perspective the size of the staff image or portion thereof seen in the telescope will diminish as the distance of the staff from the telescope increases, and, therefore, if the staff is placed, say, 100 feet distance from the telescope, and if at that distance feet, for example, is the portion of the image of the staff contained within the space in the diaphragm of the telescope (fig. Bounded by the horizontal cross hair or line (a) and the lower edge of the diaphragm (b), we have a datum where by any distance that the staff is moved to can be determined from the portion of its image enclosed within the vertical space ab. (for finding datum, also see Preface.) For instance, if the staff is moved and the telescope directed on it, and the portion of the staff image contained within the space A B found to be 3 20 we have the simple proportion sum 100 feet distance to the staff. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work.
